ABSTRACT

The use of space for formal instruction in fall 1977 at the Center and South campuses of Macomb County Community College was examined for five time spans: prime time day (weekdays, 8 a.m.-1 p.m.), prime time night (Monday-Thursday, 6 p.m.-10 p.m.), prime time week (prime time day and night), afternoon (Monday-Thursday, 1 p.m.-6 p.m.), and schedule week (Monday-Friday, 7 a.m.-11 p.m., Saturday, 8 a.m.-4 p.m.). The ratio of room utilization to room availability was calculated in half hour time periods. The total number of half hour periods of use was divided by the total number of half hour periods of availability during the time spans and calculated for each room, building, campus, and the college as a whole. To determine whether there was a difference in the use of rooms because of their function, each space was designated either a lecture room or a laboratory. Findings show that the college utilized 226 rooms for instruction; 146 were lecture rooms and 80 were laboratories. Except for during the afternoon, a lecture room was more likely to be in use than a laboratory. At both campuses, instructional space was more effectively used during evening prime time (75%) than during day prime time (62%). To identify space much or little used, a definition of "normal" was applied. A room in use 84% or more of the time was said to be used more than normally; one in use 16% or less of the time, less than normally. Tables outline data on room use by campus. (MB)

INTRODUCTION

The purpose of this study is to examine and report the use of space for formal instruction in the Fall 1977 term. Space used at Center and South Campus is reported, including that used by Applied Technology, Continuing Education, and the Criminal Justice Training Center. Off campus instruction is not included.

To determine when the various locations were in use, certain instructional administrators were consulted. Each attested to the accuracy of the data for a particular unit as of a given date:

Unit	Administrator	Dates
Allied Health and Nursing	G. Weiss	10/03/77
Business and Public Service	T. Dixon	10/03/77
Continuing Education	L. Teal	9/30/77
General Education:		
Center Campus	J. Yizze	9/28/77
South Campus	R. Peters	9/29/77
Technical Education	E. Anzicek	9/16/77

These data were compared with class schedules and in some instances reviewed and revised. What appears in the study is valid as of October 14, 1977. Changes in the use of space after that date are not reported.

The use of instructional space for certain events is not reported, however. The physical education facility, for instance, is used for many activities other than instruction, sometimes as part of intramural or intercollegiate sports and sometimes for staff and community recreation.

Other space is used for singular programs of the Community Resource Center. Events like these are not included because they are not assigned section numbers or are not regular weekly activities throughout the term.

PROCEDURES

Instructional space was examined for five time spans: 1) prime time day, 2) prime time night, 3) prime time week, 4) afternoon, and 5) schedule week. Definitions of these time periods were agreed upon with the Office of the Vice President for Instruction.

The ratio of room utilization to room availability was calculated in half hour time periods. The total number of half hour periods of use was divided by the total number of half hour periods of availability during the time spans listed above and was calculated for each room, building, campus and the college as a whole. Half hour periods before 7:00 A.M. and after 11:00 P.M. were omitted.

To determine whether or not there were differences in the use of rooms because of their function, each space was designated either a lecture room or a laboratory. The latter term was employed in a broad sense to indicate any space suited for activities demanding more than ordinary equipment such as desks, chairs, and chalkboards. The designations assigned conform to those used in "South/Center Campus Room Allocations Fall/Spring 1977-78," circulated by the Vice President for Instruction.

FINDINGS

The College utilized 226 rooms for instruction during 1977 fall term. Of these, 143 (65 percent) were lecture rooms and 80 (35 percent) were laboratories.

Most of the time a lecture room was more likely to be in use than a laboratory. During the afternoon, however, the laboratories showed slightly higher utilization of available space (28 % in comparison to 25% for lecture rooms).

At both campuses, instructional space is used more effectively during evening prime time (75%) than during day prime time (62%).

During the afternoons, Center Campus makes better use of its available space than does South Campus. At all other times, however, South Campus shows a higher utilization of space than Center.

To identify space much or little used, the statistician's definition of normal was applied. A room in use 84 percent or more of the time is said to be used more than normally; one in use 16 percent or less of the time, less than normally. Tables 5 through 8 identify the particular rooms in each category for each campus and for each time space.

No instructional space on either campus was used throughout the entire week.

CONCLUSIONS

A comparison of the findings in this study with those in the studies made in Fall 1976 and Spring 1977 shows that Center Campus is improving its use of space, while South Campus and the College as a whole are not. Nonetheless, South Campus still makes better use of its space than Center, except for afternoons. (See Figure).
